

# Glazelite critical sizes

## TOP VIEW

## SIDE VIEW

## WHAT SIZES YOU NEED TO KNOW

In order for us assist you in choosing a Glazelite and obtain a quote, we need to know several critical sizes.

Simply tell us the sizes that are labelled in the diagrams so that we can help you find the most appropriate Glazelite.

Critical sizes you need:

1. Angle of the slope
2. External upstand dimension (Including weathering finishes)
3. Internal upstand dimension (Excluding internal finishes)
